

HYCON HRD28X ROCK DRILL

PRODUCT FEATURES

The HYCON HRD28X is a high performing handheld rock drill designed for the toughest drilling applications in granite and concrete up to 6 meters of drilling depths.

Using standard integral drill steel with air-flushing from an external compressor combined with a high performing hydraulic impact and rotation unit makes the HRD28X a lighter, powerful and efficient rock drill.

The HRD28X rock drill is ideal for anchoring holes as well as blast- or splitting holes measuring between 25-50 mm when you need to drill deeper with maximum air flushing.

Combined with a compressor of your choice, it is made for underwater drilling, making it the professional divers rock drill choice no. 1.

Blending the hydraulic and pneumatic advantages in one product, you get a rock drill that can drill anywhere, go deeper and still light enough to use for many hours.

Simply connect it to one of HYCONs compact hydraulic power packs and a compressor – and start drilling.

Consult one of our salespersons for recommendations for deeper and wider drilling

HYDRAULIC ROCK DRILL HRD28X

Item no. HRD28X	1010301		
Technical information		Rotation (Clockwise), r.p.m.	320
Dimensions: LxW, mm/ Weight, kg	708x406/27,5	Blow frequency, Hz	40
Oil flow, l.p.m.	30	Noise level LWA dB	105
Working pressure, bar	130	Min. Required Air Flushing, m ³ /h	10
Max. pressure, bar	172	Vibration level (3 axis) m/s ²	13
Drill steel shank size, mm hex	22x108	Air connection	1/4" BSP Female Thread
